NORTON

SAINT-GOBAIN

NORTON VENTED
PAINT CUP SYSTEM

TECHNOLOGY MADE EASY

Transform your automotive paint department with the Norton Vented Paint Cup System. With a pre-installed filter and vent, this re-imagined design does not require a liner, just attach a new cup and go. You'll work faster, be more productive, and achieve the show-quality finish you and your customers demand.

MORE EFFICIENCY
save time prepping and cleaning

MORE ECONOMY
fewer materials, less waste

MORE CONFIDENCE
easy assembly with superior results

MORE VERSATILITY
adapts to nearly all spray gun models

BOLD INNOVATION

Experience an advanced design that offers more simplicity and increased cost-effectiveness.

Standard paint cups (Top) use liners that hold a lot of wasted paint

LINERS

Norton Vented Paint Cups (Bottom) let you use nearly every drop or seal and store any leftover paint directly in the cup

NO LINER

NORTON

SAINT-GOBAIN

FLAWLESS FINISH

Consistent material flow and transfer optimization results in a high-quality finish to ensure customer satisfaction.

UNIFORM FLUID FLOW

does not starve the paint

MORE CONSISTENT COLOR

air flows freely from cup to sprayer to keep paint application constant and prevent defects

LESS REWORK

with a new cup every time and individually wrapped lids, there's no contamination from use to use

TRUE TRANSFORMATION

Change your painting workflow and see how it changes your productivity and profitability.

VENTED DESIGN

fast and easy with minimal assembly required

IMPROVED CYCLE TIME

with mix ratios on the cup, there's no need to mix in one container then transfer to a lined cup, giving you less waste and easier clean-up

CONVENIENT

simply mix, spray, and store in one cup
